

# 3 SEAMLESS IPHONE DATA TRANSFER

## 1

### Quick Start Method

- Gather Both Devices: Have new and old iPhones ready.
- Turn On Wi-Fi and Bluetooth: Ensure both devices are connected and enabled.
- Initiate Quick Start: Place the new iPhone near the old one and follow the prompts.

### iTunes or Finder Method

## 2

- Backup Your Old iPhone: Use iTunes on Windows or Finder on Mac.
- Restore on New iPhone: Connect the new iPhone and select the backup to restore.

### AirDrop Method

## 3

- Choose Your Files: Select the data you want to transfer on your old iPhone.
- Send via AirDrop: Tap the share icon and choose your new iPhone as the destination.
